### Metallic and Pearlescent Effects

**Pewter**

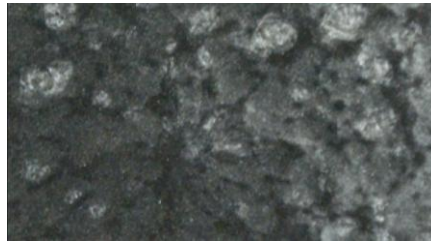

**Cobalt Blue**

**Pewter and Cobalt Blue**

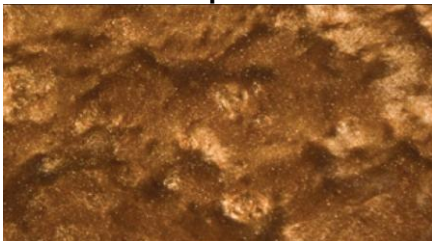

**Graphite**

**Charcoal**

**Sparkle Silver**

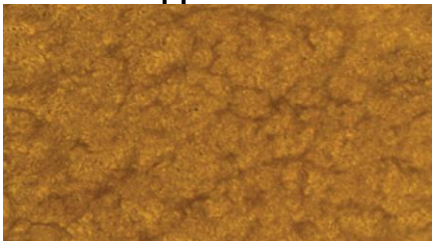

**Copper Kettle**

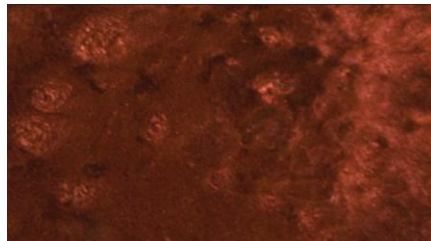

**Chocolate**

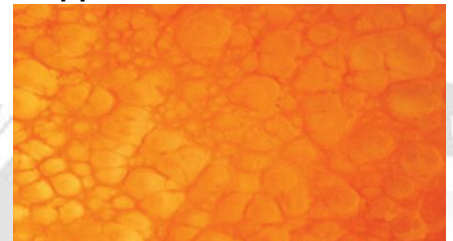

**Copper Kettle and Chocolate**

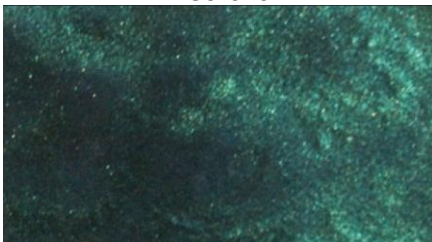

**Mustard**

**Cranberry**

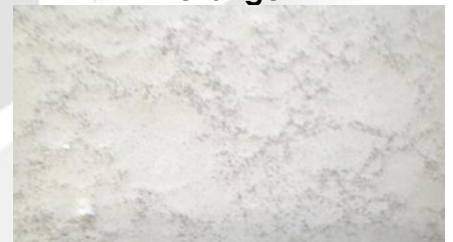

**Orange**

**Emerald Green**

**Pistachio**

**Pearl (in white pigmented resin)**

Printed color chart approximates actual color. Final color appearance is affected by lighting, surface texture and method of application. Two or more metallic powders can be combined to produce a metallic effect. Final color approval should be made from physical samples produced by the installing contractor. Depending on sealer selection, a clear gloss or clear satin top coat may be required to achieve the desired look.
